PATIENT INFORMED CONSENT TO CHIROPRACTIC CARE

Patient Name: _____ Date: _____

To the patient: Please read this entire document prior to signing it. It is important that you understand the information contained in this document. Please ask questions before you sign if anything is unclear to you.

The nature of the chiropractic adjustment

The primary treatment used by a Doctor of Chiropractic is spinal manipulative therapy. I will use that procedure to treat you. I may use my hands or a mechanical instrument upon your body in such a way as to move your joints. That may cause an audible pop or click much as you have experience when you crack your knuckles. You may feel a sense of movement.

Analysis/Examination/Treatment

As part of the analysis, examination, and treatment, you are consenting to the use of some or all the following procedures at my discretion:
Spinal manipulation, palpation, vital signs, range of motion testing, orthopedic testing, basic neurological testing, muscle strength testing, postural analysis testing, hot/cold therapy, EMS therapy, cold laser therapy, mechanical traction, flexion distraction.

The risks inherent in chiropractic adjustments

As with any healthcare procedure, there are certain complications which could arise during chiropractic manipulation and therapy. These complications include but are not limited to: fractures, disc injuries, dislocations, muscle strain, cervical myelopathy, costovertebral strains and separations, and burns. Some types of manipulation of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke. Some patients will feel some stiffness and soreness following the first few treatments. The Doctor will make every reasonable effort during the examination to screen for contraindications to care; however, if you have a condition that would otherwise not come to the Doctor's attention it is your responsibility to inform the Doctor.

The probability of those risks occurring

Fractures are rare occurrences and generally result from some underlying weakness of the bone which we check for during the taking of your history and during examination and x-rays if deemed necessary from examination findings. Stroke and/or arterial dissection cause by chiropractic manipulation of the neck has been the subject of ongoing medical research and debate. The most current research on the topic is inconclusive as to a specific incident of this complication occurring. If there is a causal relationship at all it is extremely rare and remote. Unfortunately, there is no recognized screening procedure to identify patients with neck pain who are at risk of arterial stroke.

The availability and nature of other treatment options

Other treatment options for your condition may include:

Self-administered, over the counter analgesics and rest.

Medical care and prescription drugs such as anti-inflammatory, muscle relaxants and pain-killers.

Hospitalization

Surgery

Other various treatment options

If you choose to use one of the above noted other treatment options, you should be aware that there are risks and benefits of such options and you may wish to discuss these with your primary medical physician.

The risks and dangers of attendant to remaining untreated.

Remaining untreated may allow the formation of adhesions and reduce mobility which may set up a pain reaction further reducing mobility. Over time this process may complicate treatment making it more difficult and less effective the longer it is postponed.

Consent to treatment (MINOR)

I hereby request and authorize Dr. Lehane and/ or Dr. Lee to perform diagnostic tests and render chiropractic adjustment and other treatment to my minor son/daughter: _____. This authorization also extends to all other doctors and office staff members.

As of this date, I have the legal right to select and authorize health care services for the minor child named above. (If applicable)Under the terms and conditions of my divorce, separation or other legal authorization, the consent of a spouse/former spouse or other parent is not required. If my authority to so select and authorize this care should be revoked or modified in any way, I will immediately notify this office.

PLEASE CHECK THE APPROPRIATE BLOCK BELOW WHEN SIGNING

I have read ( ) or have had read to me ( ) the above explanation of the chiropractic adjustment and related treatment. I have discussed it with Dr. Lehane and /or Dr. Lee and have had any of my questions answered to my satisfaction. By signing below I state that I have weighed the risks involved in undergoing treatment and have decided that it is in my best interest to undergo recommended treatments. Having been informed of the risks, I hereby give my consent to treatment.
